

Graver Technologies

INDUSTRIAL FILTRATION PRODUCTS

Turbine Air Intake Elements and Prefilters

Graver Technologies has been a recognized leader for over 30 years in the supply of filtration products for the power generating industries. Graver Technologies offers a complete range of replacement filters for numerous manufacturers. Our ISO quality program and straight line manufacturing system insures our customers always receive the highest quality filtration products each and every time. From conical to cylindrical, from cellulose to synthetic, put Graver Technologies to work in your facility

CAPABILITIES THAT DELIVER

Design

- 3D Modeling Software
- Dedicated Product Development Team
- Fast Track Prototypes
- Testing
- ISO 9001:2000 Quality System

Manufacturing

- High Speed Rotary Pleater
- HEPA/ULPA Pleater With Glue Bead Technology
- Computer Assisted High Speed Pleater
- State of the Art Straight Line Manufacturing System
- ASME Code/PED Housing/Metal Shop

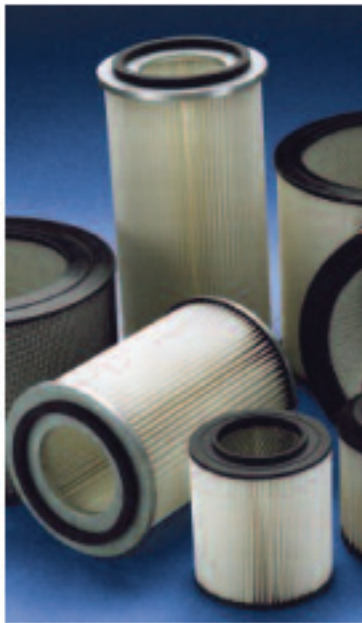

Technology

- ASHRAE, HEPA and ULPA Media
- Efficiencies to 0.12um at 99.99999%
- Hydrophilic, Hydrophobic and Oleophobic Media
- Activated Carbon for Efficient Odor Removal
- Temperature Range: Sub-Zero to 700°F/420°C
- Self Cleaning Pulse Systems

The Graver Technologies Custom/OEM Filter team designs and manufactures high efficiency filters produced to customer specifications. We focus on opportunities that allow us to offer value added services, products, and product support. Our filters perform at levels that meet or exceed customer requirements. Our technical staff has earned a reputation for exceptional problem solving capabilities built upon decades of practical experience.

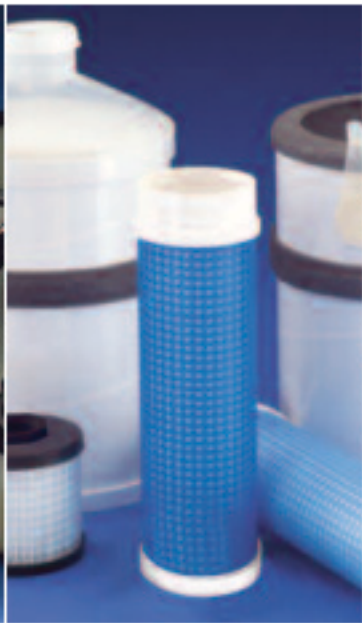

We work with our clients from the beginning, starting with initial conceptualization and specification, to design, prototyping, and finally, full scale production. Our manufacturing capabilities enable us to handle production runs from hundreds of pieces to tens of thousands of pieces annually. Our dedication to delivering superior quality products and customer service is reflected in the fact that we are an ISO 9001:2000 registered company. Our quality system assures that we are in conformance with our customer's requirements.

Whether your product is already in the field and the filter needs upgrading or still in the product development stage, put Graver Technologies' Product Development team to work for you.

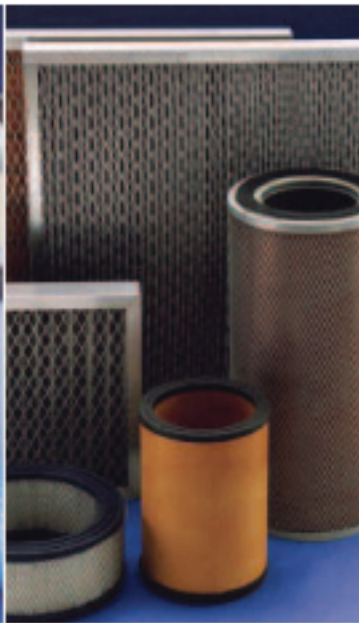

Industrial Vacuum Cleaners

- Woodworking
- HEPA
- Power Tools
- Construction

Medical Devices

- Smoke Evacuators
- Respirators
- Autoclaves
- Vent Filters

Rotating Equipment

- Blowers
- Compressors
- Turbines
- Vacuum Pumps
- Semiconductor

Contract Pleating

- HEPA
- ULPA
- ASHRAE
- Synthetic
- Fiberglass
- Multilayer
- Cellulose
- Self Supporting
- Metal

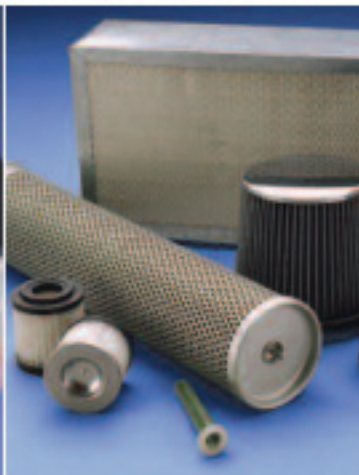

Panel Style Filters

- Air Intake
- HVAC/HEPA
- Office Equipment
- Cleanable Metal Mesh

Multi-Stage Elements

- Smoke
- Odor
- Oil
- Ozone
- Particulate
- Coalescing

Transportation

- High Performance Automotive
- Aviation
- Off Road
- Agricultural
- Military

Housings & Equipment

- Housings for Air/Gas & Liquid
- ASME Code & Designs
- PED-97/23/EC
- CRN
- Constructed in Stainless Steel, Carbon Steel & Aluminum

Whether your business is around the corner or around the world, Graver Technologies can support you with superior products and services. Our products are used worldwide. In fact, we export more than 35% of the products we manufacture. You'll find Graver filters in some of the most challenging filtration environments in North America, Europe, Asia, the Pacific Rim and South America.

Graver Industrial Filtration Products is just one of the brands that comprise Graver Technologies, a member of the Marmon Group of companies. Graver Technologies delivers products that facilitate and enhance separation, purification, and process filtration. As a member of the Marmon Group, a conglomerate with annual revenues of more than \$6 billion worldwide, Graver Technologies gives you the flexibility of working with a small company that benefits from stability, resources, and innovation of a global corporation.

Choose Graver for your next project.
